Yoddha Fly Ash Bricks

Sustainable Strength for the Future of Construction

Fly ash bricks are revolutionizing the construction industry by offering a high-performance, eco-friendly alternative to traditional clay bricks. Manufactured using industrial waste materials such as fly ash, cement, sand, and water, these bricks are engineered to meet modern building requirements while reducing environmental impact.

TECHNICAL SPECIFICATIONS:

Sizes Available:

- 230 × 110 × 75 mm
- 300 × 200 × 100 mm
- 190 × 90 × 90 mm (customizable)

Density: Approx. 1700–1850 kg/m³

Average Compressive

Strength: 7.5–10 MPa

Water Absorption: <10%

Conforms to IS 12894

APPLICATIONS

Residential Buildings

Commercial Complexes

Institutional Infrastructure

Internal and External Partition Walls

KEY BENEFITS

High Strength: Strong load-bearing for lasting durability.

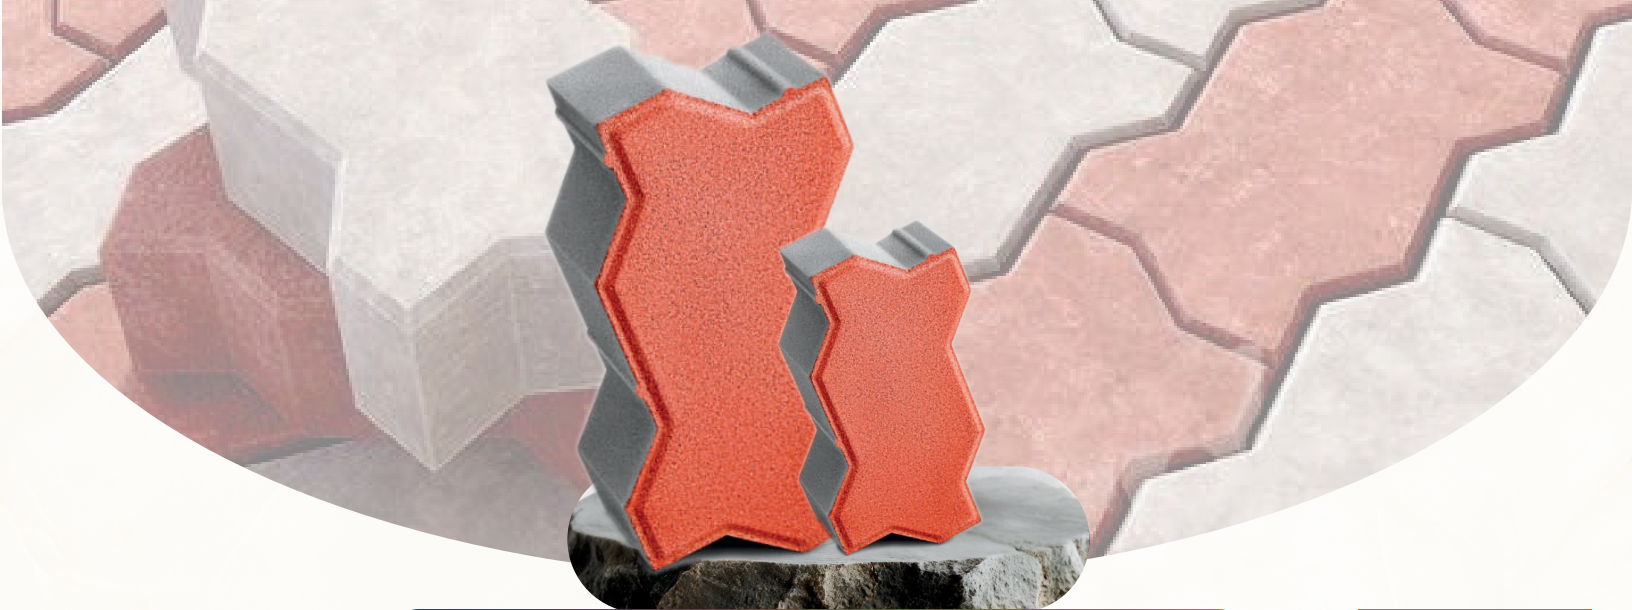

Accurate Shape: Quick build with less plastering.

Eco-Friendly: Made from fly ash, saves topsoil.

Water-Resistant: Low absorption, weatherproof.

Thermal Insulation: Keeps interiors cooler.

Soundproofing: Reduces outside noise.
